Dear Limousin Enthusiasts,

It is our honor and privilege to present this offering of beautiful Fullblood cattle. Thomas Farms is dispersing all Fullbloods between one and eight years old and their calves by side. Staying with us are the Grannies and their calves.

Fullblood Limousin are beautiful cattle. Our first cattle, our first love of cattle, back in 1981 when we purchased our first farm. It all started when our daughter, Amy, had a desire to show cattle. Then just a few pair, it built from there. She did show and won Grand Champion Female at the Arkansas State Fair. She even took showmanship awards and won the Purple Circle with her heifer MK Sherry. We were all hooked. These were the ones. Several nice animals were purchased.

Amy went off to college and we began to expand the herds. One of our best decisions was to purchase MH Southern Cross 548D at five days old, one of the earliest Polled Fullbloods in the breed. Almost all of our cattle have him as a base. He added depth, milk and disposition, staying away from the more framey-type animals. The goal is depth, depth and, oh yes, all the other good things to, Limmy hips! And most importantly, the longevity they offer as you can tell by my comments on some of these ladies.

Warp speed to the present, we have developed three distinct breeds with the breed. Fullblood, Purebred and Lim-Flex. They all have their place in our program and all offer a different product. However, the Fullbloods are the cattle we see from our deck by choice. I don't ever get my fill of seeing the sun coming up over the pasture back lighting the Fullbloods. They glow in the morning light while having coffee. What a Blessed sight.

All first-calf heifers, no matter what group they are born in, are bred to Lim-Flex bulls. Mostly the calves are born real small making life easier on the heifer, and yet those calves grow to the weaning pen the same as the other calves. The heifers breed back more consistently we find. The females from this method go to supply the black herds with fresh stock. The Fullbloods are bred Fullblood from there on.

The forestry business is full time and takes it. We will continue forestry way into our old age as most of it is done by phone and computer now. Cattle stay within the numbers we can handle with our terrific work force.

The future of our great country is encouraging to us and we always want to be a positive influence as much as we can. God has blessed us over and over again, plus we will be married 50 years this year. We wish all of you the same blessings.

God bless you and your cattle.

Rick & Sandy Thomas

TERMS & CONDITIONS

Terms of the sale are cash unless satisfactory credit arrangements have been made prior to the sale. A representative will be on hand sale day if you wish to insure your purchases. Please note: All persons who attend the sale do so at their own risk; Sale Management or Consignor do not assume liability, legal or otherwise, for any accidents which may occur.

TRUCKING

Trucking will be available

ANNOUNCEMENTS

Announcements made sale day by the owners or auctioneer take precedence over statements in this sale catalog..

GUARANTEE

All cattle sell under the standard guarantee of the North American Limousin Foundation. Cattle guaranteed exportable to Canada.

SPECIAL THANKS TO

Cole Abele, Brett Neil, Quin Peterson and Brian Lamon

Dear Limousin Breeders,

Welcome to this historic and milestone sale, The Infusion, the dispersal of the entire fullblood herd of Thomas Farms. Rick and Sandy Thomas have been a constant and reliable source of Limousin seedstock since the very beginning. They have become one of the longest continual breeders of Limousin in North America. They ARE the largest registrant of fullblood Limousin in North America. Every functional fullblood female and their progeny is included in this offering.

I first met Rick Thomas in the very early 1980s in Charlottesville, Virginia. While on forestry business in the foothills of the Blue Ridge Mountains, Rick viewed the herd of fullblood Limousin I was managing at the time. I appreciated his enthusiasm and determination for building a quality herd on the farm he was developing in the Boston Mountains in Northwestern Arkansas. He and Sandy still share that enthusiasm for the breed today.

The forestry business and the time it demands is dictating the size of the Thomas cattle enterprise. The decision to disperse the fullblood breeding herd did not happen overnight. This spring, the fullblood herd sells at the very zenith of its existence as one concentrated breeding unit. Each and every member of this offering can make a unique and significant impact on new and established breeding herds throughout North America. The females contain the stacked genetic fabric to carry forth a renewed and reliable source of seedstock to push the industry on. The young bull and heifer calves offer future excitement and outreaching potential to all breeders. The herd sires and breeding bulls offer yet a new dimension to the industry for the registered and commercial breeders, alike.

The fullblood genetics that are a part of this dispersal have also served as the foundation for the purebred and Lim-Flex breeding herd that will continue to exist at Thomas Farms. The seedstock carrying the ARSN prefix offer the versatility to expand any segment of the Limousin and Lim-Flex industry throughout the continent.

It gives me great appreciation to be involved with my friends, Rick and Sandy Thomas, to orchestrate this historic and timely sale event. If I may be of any assistance to any of you, please do not hesitate to contact me.

Warmest regards,
Keith Kissee

SCHEDULE

Cattle available for inspection at the farm until May 9.

AR Zillion 226Z has been a remarkable breeding bull, and his progeny and service are a major part of the Thomas Farms fullblood dispersal. He is a balanced sire of performance and maternal power throughout. The homozygous polled breeding bull has sired some of the most impressive females in the industry. His sons are full of muscle and dimension. His influence is immeasurable as evidenced by the wide array of progeny in this exciting sale offering. He sells in his entirety. He is sound, excellent footed and ready for herd sire duties anywhere.

AR Colonel 531C is a homozygous polled bull of extraordinary pedigree derivation. His entire family is included in this sale offering, and his direct progeny are a highlight of this dispersal sale offering. His progeny sell at the side of their dams, and yearling sons and daughters are a part of the sale offering. He has earning noted appreciation for the genetic enhancement he has added to the Thomas program. His dam sells as Lot 32. A full sister sells as Lot 59. He is one of the most significant fullblood bulls to sell in some time.

AR Command West 5127C has an impressive set of progeny among this sale offering. He was selected for use in the herd based upon the success of the entire cow family from which he was born. His influence is scattered among the pages of this most important fullblood dispersal sale. Decades of selective breeding is a part of this young breeding sire's heritage. Many closely related individuals are among the sale inventory outlined in this sale catalog. His dam sells as Lot 28.

AR A Hootenanny 360A is a polled fullblood female with a homozygous polled heifer calf at side by AR Colonel 531C. This is an awesome pair and a favorite of many visitors. This female would absolutely never leave the farm if not for this dispersal sale of the entire fullblood breeding herd. She descends to the foundation female, MK Sherry, the competitive show heifer that served as one of the principal females that contributed to the forming of the Thomas herd. A full sister sells in this dispersal sale, as well as Lot 30.

AR Audrey Anna and her heifer calf are a homozygous polled fullblood pair from breeding program. The heifer baby has the look and substance to handle herself anywhere...show ring, breeding pasture or even as a future donor female. This is a combination pair of the best breeding available anywhere. Her maternal sister sells as Lot 12.

AR Bubble Butt Mae is the only daughter of CF Jim Dandie 218U in the dispersal sale offering. The polled female has a homozygous polled heifer calf at side. This exceptional female is from the Mae cow family. Lower birth weight and higher milk EPDs make this a valuable genetic piece for the future. Three females from this cow family are also a part of the sale inventory.

AR Ballyhoo 493B and her bull calf by AR Colonel 531C are a phenomenal homozygous polled fullblood pair. She descends from the great Ballyhoo cow family, and she is one of the stars from this great and unique cow family. She reaches back through her pedigree to the original seedstock that helped form the Thomas breeding program. Her dam (Lot 30) and two full sisters (Lot 26 and 67) are among the sale offering.

AR Allegra Mae 355A and her bull calf, AR First Command 813F, are a tremendous breeding pair, and her bull calf at side is an exceptional baby in the sale offering. This female is the familiar genetic combination that has generated much consistency and success within the herd. Her 2015 daughter, AR Chestnut Lilly Mae 592C, is in the Oklahoma program of Diamond W Ranch. A full sister, and maternal sisters (Lots 13, 27 and 64) are among the sale inventory of this dispersal of the largest herd of fullblood Limousin in North America.

AR Cutesy Wiggles 5118C is a young polled female with her first calf born at side. The daughter of AR Zillion 226Z is from the powerful line of blood that has created a strong maternal line that is vividly apparent in the cow herd. She has a double polled and black heifer calf at side by TMCK Barrett 116B. Limitless potential is available through this cow and bull calf pair.

JAWW Alyssa 055A is one of the good milking and straight lined daughters of SVL Polled Exclusive 412T in this elite group of fullblood breeding females. The paternal sisters and brothers to this young female are among the very best individuals in the entire fullblood aspect of Limousin cattle breeding. She has a polled heifer calf at foot sired by AR Zillion 226Z. This genetic combination represents some of the most consistent and well-respected bloodlines in the industry. Only in a dispersion of this magnitude would females such as this be offered for sale.

SVL Polled Excelant 758X is a homozygous polled female with a homozygous polled heifer calf at side by AR Zillion 226Z. This female was the choice of all the females in the Stone Valley Dispersal. She has one of the highest weaning and yearling EPDs in the entire fullblood gene pool. The trait-leading performance has overwhelmingly positively impacted the entire Thomas breeding program through the superiority of her progeny. Her son sells as Lot 2. Her daughters sell as Lots 10 and 59. The breed's apex of fullblood genetics are among this absolutely phenomenal cow family of elite genetics. Only in a dispersal are genetics such as this made available at auction.

AR Yeah Jean 138Y is from one of the strongest of fullblood herd sires, AR Pol Polititian 4132P. Her dam, AR Leah Jean 910J, by MH Southern Cross, will have a calf soon at nineteen years of age. Longevity is a tremendous genetic asset with the influence of AR Southern Cross progeny and descendants. A full sister, AR Aylah Jean 336A (Lot 37), and two maternal sisters, AR Bonnie Jean 439B (Lot 43) and AR Dallas Jean 621D (Lot 61) are among the inventory of this extraordinary dispersal sale offering. This is one of the real consistent cow families made available to the buying public only through a dispersion of this magnitude. Her 2015 female, AR Cutie Jeanie 5145C, was purchased by Andy McCutcheon for his great breeding program here in Arkansas.

PE'd 11/20/17 to 3/1/18 to AR Zillion 226Z (FB,HP)

TERL Polled Lucy is a polled female from the powerful genetics sired by SVL Polled Exclusive 412T. Her dam, TERL Polled Golly traces to one of the most prolific fullblood females in history, Laura's Accent. Similar genetics have become some of the most prominent lines in the industry. She calves to AR Zillion this fall.

If one were to narrowly define the very best of the very best in the Thomas Farms fullblood herd, AR Delicate Lace 619D would be a part of the short list. She exudes only the best of the breeding program and entire aspect of the fullblood Limousin industry. She combines the homozygous polled gene with trait-leading performance EPDs and eye-catching phenotype. She is the most advanced version of this great cow family that has made such an over-powering impact upon this great Thomas Farms breeding program. The

LOT 59

entire cow family sells in this sale, and AR Delicate Lace 619D is one of the highlights of this important sale event. She will have a homozygous polled and black calf this fall.

AR Dear Lacy Love 6130D is an elite genetic piece, and she is ready for immediate breeding at sale time. Balanced EPDs make this female another of the ready-to breed females such a noted breeding piece. She, her dam and entire family line is available for purchase through this dispersal sale inventory.

LOT 70

LOT 71

LOTS 69-82

This is one of the greatest groups of young fullblood open females assembled at one place, one time and one tattoo for quite some time. The entire group of females are polled, multi-generational polled or homozygous polled. The same cow families that have infused the superior blood into this vast and breed-leading fullblood herd serve as the underpinning maternal strength to this group that are offered here. The most advanced fullblood genetics in the world are a part of this open heifer offering. Eight daughters of AR Zillion 226Z and five daughters of AR Colonel 531C are offered with the special advantage of youth. The females are beginning to cycle and are available for the new owner to continue forward with these genetic breeding pieces.

PUREBRED & LIM-FLEX OPEN HEIFERS

LOTS 83-89

Though small in numbers, this stylish, well-bred set of black, polled open heifers are huge on quality. Out of the leading black, polled Lim-Flex herd sires in the Thomas program, these spring-born open heifers represent the progressive nature of Rick and Sandy Thomas. These daughters of TMCK Barrett, TMCK Carbon 14 68Z and AUTO Boot Daddy are the kind you can build a program around. When studying the maternal side of their pedigrees, it becomes obvious the same attention to stacking predictable maternal pedigrees was followed as with their fullblood contemporaries. Rick and Sandy Thomas have been ardent students of the Limousin seedstock business for 38 years, and only through a sale such as this, would you get the opportunity to purchase a foundation set of females such as these.
